Abstract (en)

[origin: EP2182197A1] The method involves transferring an electronic control device from an active operating condition into a stand-by operating condition for a time period based on an operation condition parameter of a vehicle during stopping of the vehicle. The control device is transferred from the stand-by condition into the active operating condition without initialization during operation of the vehicle. The control device is transferred from the active operating condition into a deactive operation condition in a stop position of the vehicle after a course of the time period.
