Abstract (en)
[origin: US2011115352A1] A shelf element which is intended to be incorporated in a shelf contains, at each of its corners, an angular profile (1) whose upper and/or lower ends are to be connected to a similar angular profile (1). The shelf element contains at least one plate element (2). The plate element (2) is cut out at the corners in such a way that an angular profile (1) of another shelf element can be inserted into the angle between the two limbs (8) of the angular profile (1) without being disturbed by the plate element (2).
