Abstract (en)

[origin: US2012024327A1] A machine for treating containers, having a plurality of spray tubes which are oriented transversely to a distributor channel, and of which each is secured in a releasable manner, on at least one end, to a cutout of the distributor channel, the spray-tube end and the distributor channel have provided thereinbetween a bayonet lock which can be released by a partial rotary movement about an axis of rotation, essentially parallel to the spray-tube axis. The bayonet lock is provided with a seal and has locking elements which are in mutual engagement with one another on the distributor channel and on the spray-tube end.
