Abstract (en)

[origin: WO2009027480A1] The invention relates to a composite component comprising at least one base plate and at least one sandwich component which is arranged on the base plate, and to the advantageous use of the composite component according to the invention. The object of providing a composite component with very satisfactory vibration-damping properties which can additionally be produced in a simple way and at the same time is suitable for lightweight design concepts is achieved by the fact that the sandwich component (5) has at least two outer plates (6, 7) and at least one plastic layer (8) which is arranged between the plates (6, 7).
