Abstract (en)

[origin: EP2184213A1] The rail-mounted vehicle has a driver chamber (1) with a floor structure (3), where the floor structure has two segments. A separating joint runs transverse to a driving direction (9) of the rail-mounted vehicle. One of the segments of the floor structure is deformed in driving direction of the rail-mounted vehicle, where deformed segment is formed as foam, particularly as metal foam or plastic foam.
