Abstract (en)

A system includes a web server (103) and an apparatus (101) with a web browser configured to display an operation screen provided by the web server (103). The apparatus authenticates a user and transmits authentication information to the web server (103) when the user is authenticated and requests the operation screen which is to be displayed on the web browser. The web server (103) determines whether the authentication information has been received from the apparatus when the operation screen is requested and transmits the operation screen to the apparatus when it is determined that the authentication information has been received from the information processing apparatus as a result of the determination.
