Abstract (en)
[origin: WO2009027402A1] The invention relates to a method for manufacturing a water-bearing domestic appliance, in particular a dishwasher or washing machine, at least having a washing container for accommodating the items to be washed, said washing container being formed at least in portions from metal materials, in particular from stainless steel. The invention is characterized in that at least two different metal materials are used to form the washing container.
