Abstract (en)

[origin: WO2009018841A1] The invention relates to a method for setting up a painting system (22) in a predefined setup location (20), wherein the painting system (22) comprises at least one module group (26, 28, 30), which is provided for a work step and which further comprises a number of modules (16, 16', 16'', 16''') that are functional per se, which contribute to performing the work step, and wherein each module (16, 16', 16'', 16''') has components (14, 14', 14'', 14''') specific to the module, wherein in a first step preferably each module (16, 16', 16'', 16''') of the module group (26, 28, 30) is completed in a finishing location (10), in a second step each module (16, 16', 16'', 16''') of the module group (26, 28, 30) is transported to the setup location (20), and in a third step the painting system (22) is set up by connecting all modules. The invention further relates to a painting system (22).
