Abstract (en)

[origin: WO2009030861A2] The invention relates to a negative pressure clamp that comprises a bearing plate (3) including a plurality of chambers (4) into each of which gives a suction duct (5), said working plate being covered with a flexible and formable working plate (2) having suction openings (7) formed therein for drawing a part to be maintained and perforations (9) in which are inserted the lugs (8) of the bearing plate arranged about the chambers (4).
