Abstract (en)

[origin: WO2009044032A2] This case (10) for a set of tools provided with a handle comprises a first holder (17) and a second holder (18) which are hinged together by a hinge (19) between a first position and a second position, and the holders (17, 18) comprise two partitions (24) which are substantially parallel to one another and which define a channel (22) intended to receive and retain the handle of a tool, each housing comprising two partitions (24, 124) substantially parallel to one another defining a channel (22, 122) intended to receive and retain the handle (16) of a tool. Each channel has a slightly greater width than the smallest dimension of the handle (16) of the associated tool, the handle being arranged substantially vertically in each channel. Application to the storage of a set of open-ended spanners or ring spanners.
