Abstract (en)

[origin: WO2009034505A1] Heat-insulating container for the packaging of food products which are frozen or are to be frozen, comprising a first cuplike containing body (2), having a lateral wall (4), a bottom wall (6) and an open mouth (8), and a second cuplike containing body (10) with a corresponding lateral wall (12) and mouth (16), with which a closing element (36) is associated, said second containing body (10) being fitted into the first containing body (2) and being shaped so as to form a gap (18) between its lateral wall (12) and the lateral wall (4) of the first containing body (2), characterized in that the lateral wall of said first containing body (2) has a plurality of apertures (30) communicating with said gap, and in that the bottom wall (6) of said first containing body (2) has a plurality of apertures (32) also communicating with said gap (18), said apertures being arranged so as to permit a flow of air through said gap (18) when the container is placed with said closing element (36) resting on a supporting surface.
