Abstract (en)

[origin: WO2009024452A1] The invention relates to an elevator system having an elevator cabin (1), a load carrier (2) for holding and/or moving the elevator cabin (1), and a detector device (8.1, 8.2, 8.3) for detecting a condition of the load carrier (2), the detector device (8.1, 8.2, 8.3) having an ultrasonic emitter (8.1) for generating and coupling ultrasonic waves (8) into the load carrier (2) and for generating ultrasonic waves (8) in the load carrier (2), and an ultrasonic receiver (8.2) for detecting ultrasonic waves (8, 8') of the load carrier (2).
