Abstract (en)
[origin: WO2009013121A2] The invention is based on a refrigerator having an insulating interior (1) and a refrigerant circuit with a condenser which is cooled via a fan, wherein an intake shaft of the fan and an exhaust-air shaft (14) of the condenser terminate one beside the other behind a covering grill (6) and beneath the interior (1), on the front side of the refrigerator. According to the invention a separator (8) is provided between the intake shaft of the fan and the exhaust-air shaft (14) of the condenser, this separator being mounted on the covering grill (6).
