Abstract (en)

[origin: WO2009033558A1] The invention relates to an identification device for an electrical line (6), which comprises at least one identification plate (2, 3) and is provided with elements (4, 5) which are to be fixed in a positive and/or non-positive fit to the electrical line (6). According to the invention, two identification plates (2, 3) are connected to one another by means of at least one flexible traction element (4, 5) arranged on each longitudinal side.
