Abstract (en)

[origin: EP2186436A1] The device has a drawing energy storage providing drawing force to draw a movable furniture part to a closing position at a furniture body. A coupling piece is movable by the effect of storage. A detachable coupling is provided between the body and the part. An ejector holds the furniture part in the closing position to the body. An ejecting element is detached in the closing position of the furniture part by the effect on the furniture part. The ejecting element is ejected by the effect of an ejecting energy storage such that the furniture part is pushed away with the ejecting element.
