Abstract (en)

[origin: EP2186452A1] The actuator has a power supply unit (22) for supplying power to a motor (24), and a case (20) comprising a first interior housing (L1) to receive the power supply unit and the motor. The case has second and third interior housings (L2, L'2) separated from the first housing by walls (35, 43) of the case. The second and third housings respectively receive a power supply cable (28) and an electronic control module (50). The cable and the module are distinct from the motor and the power supply unit. Removable covers (33, 41) isolate the second and third housings from an outer side of the case.
