Abstract (en)

[origin: EP2186742A1] The foil packing bag has two opposite lying front surfaces formed by a bag foil and bordered by longitudinal folds (4). A ventilation unit is provided with an air duct (6) running in a longitudinal direction. The air duct is extended over a part of a length of the assigned longitudinal fold. The air duct has a section of a longitudinal sealed seam (5) with a small thickness. An independent claim is included for a method for manufacturing a foil packing bag.
