Abstract (en)

[origin: EP2186763A1] A film transfer tool (1) includes an application head (33) which is adapted to be moved to a stowed position and a reel assembly (30) having a wall and two stopping members (36,37) extended therefrom. The reel assembly (30) and a shell (10,20) have an active member (50) disposed therebetween. The active member has a looped passage (57) that the two stopping members (36,37) are adapted to move thereon and the two stopping members (36,37) can make the reel assembly (30) position in a retained position in which the head (33) extends outside the shell (10,20), and release the reel assembly (30) from the retained position in order that the head (33) is stowed inside the shell (10,20).
