Abstract (en)  
The turbine component such as gas and/or steam turbine component (10) comprises a coating (12), which is configured as aluminum- and/or silicon-containing suspension, whose aluminum- and/or silicon particles (14) have a diameter of maximum 1  $\mu$ m. The coating is formed with a layer thickness of more than 10  $\mu$ m, and has a surface roughness (R<sub>a</sub>) of smaller than 2  $\mu$ m without post-treatment. A basic material (16) of the turbine component is a ferritic heat-resistant material and/or an austenitic heat-resistant material. An independent claim is included for a method for coating a turbine component.

Abstract (de)  
Bei einer Turbinenkomponente (10) wird eine Beschichtung (12), die als eine aluminium- und/oder siliziumhaltige Suspension gestaltet ist, mit Aluminium- und oder Siliziumpartikel (14) geschaffen, deren Durchmesser kleiner als 10  $\mu$ m ist.
