Abstract (en)

[origin: EP2186959A2] The T-connector has a connection element (13) fixed at an outer side (4) of a pillar profile (1) for engagement into a hollow space at a front side (15) of a bar profile (2), where the front side faces the bar profile. The connection element comprises a bolting attachment piece (17) for engagement into a recess (18) in one of bars (11, 12) within the bar profile. The bolting attachment piece comprises a bolting chamfer (20) for attachment at a counter surface (21) of one of the bars. The recess is arranged in one of the bars running transverse to the other bar.
