Abstract (en)

[origin: EP2186978A1] The bit has an assembling portion defining a passage hole (4) for passage of a rod (3), where the assembling portion is formed with two assembling parts that are assembled by a slide connection. The assembling part includes a groove defined by a stop and a tenon defined by another stop at its end opposed to insertion end of the tenon. The slide connection is oriented along a longitudinal axis of the passage hole of the rod, where the slide connection includes a dovetail or T-shaped profile.
