Abstract (en)  
A currency storage cassette 4 includes a main body which has a receiving opening 41 and a pickup opening 42 and in which a currency deposited through the receiving opening 41 is stored, and a display unit 9 attached to the main body. The display unit 9 displays a display mode that is switched among a plurality of display modes including at least first and second display modes and that is visible from the outside. The display mode of the display unit 9 is automatically switched to another display mode according to a state of the main body.
