Abstract (en)
[origin: EP2187405A1] Electrical line (1) for motor vehicles comprises: at least two insulated electrical conductors (4, 5) which are combined to form one unit; and when the line is completely fitted, a sensor (3) is connected at one end of the line, where the conductors are arranged, in a manner which is known per se, in a prefabricated plastic tube (6), and parts (7), which integrally belong to the tube, of a fastening device for securing the line at predefined fixed points of a motor vehicle are mounted on the outside of the course of the tube. Electrical line (1) for motor vehicles comprises: at least two insulated electrical conductors (4, 5) which are combined to form one unit; and when the line is completely fitted, a sensor (3) is connected at one end of the line, where the conductors are arranged, in a manner which is known per se, in a prefabricated plastic tube (6), and parts (7), which integrally belong to the tube, of a fastening device for securing the line at predefined fixed points of a motor vehicle are mounted on the outside of the course of the tube, at which fixed points parts of the fastening device which complement the parts of the tube are present.
