Abstract (en)

[origin: WO2009033535A1] The invention relates to a back rest, especially for an office chair, comprising two back rest zones (3a, 3b) that are hinged, while forming an articulated connection (8) of the four-bar chain type, to a two-part back rest support (2) having a lower supporting guide (20) and an upper back rest guide (21), in such a manner that a flexible lumbar support (5) is formed between the back rest zones (3a, 3b).
