Abstract (en)
[origin: WO2009033604A1] The invention relates to a star body for a star disk screen and a star disk screen comprising a plurality of rotatable axes oriented parallel to one another. At least one star body (10) provided with star fingers (16, 24, 26) is disposed on at least one of said axes. In order to vary the screen hole size when the star disk screen is in operation, said star body is designed or oriented eccentrically to the rotational axis (15) thereof.
