Abstract (en)
[origin: WO2009031111A1] The object of the present invention refers to a protection device for beverages' containers in general, particularly for disposable glasses in plastic, paper, paperboard and similar. In particular it comprises an annular collar 1 realized by means of an external lateral wall 4 and an internal lateral wall 3 joined to each other through an upper junction base 5 opportunely shaped. In this manner an annular site 6 is created by means of which the annular collar 1 is hooked up in a removable way on the upper edge 8 of the glass in such a manner to protect it from external contaminations.
