Abstract (en)
[origin: WO2009035271A2] The present invention relates to transmitter for efficiently transmitting signals, an efficient receiver, and methods of efficiently receiving the signals. In particular, the present invention relates to a method of efficiently transmitting P1 symbol and P2 symbol to reduce physical load and latency in a receiver. In addition, the present invention relates to a method of automatically recognizing newly added TFS ensembles by using novel signaling method.
