Abstract (en)
[origin: EP2189212A1] An emulsifier system (10) includes a mixing pump (30), a water source (20), a water intake regulator (40) for regulating the flow rate of water supplied by the water source (20) to the mixing pump (30), an air intake regulator (50) for regulating the flow rate of air being supplied to the mixing pump (30) for enabling the mixing pump (30) to output a high pressure flow of mixed fluid and gas, and an emulsifier (70) for emulsifying the high pressure flow of mixed fluid and gas outputted by the mixing pump (30) by means of a cavitation effect.
