Abstract (en)

[origin: EP2189244A2] The tool has a neck section (24) comprising a screw-shaped receiving unit for an edge section (42) of a disk-shaped part (28) of a protection cover (22). The screw-shaped receiving unit is extended in a circumferential direction of the neck section. The edge section is engaged in the receiving unit during sliding of the neck section. The cover is held at the neck section in an axial direction in a form-fit manner. The cover supported in a mounting position by a loading and/or locking unit against detachment or rotation in the circumferential direction or radial direction.
