Abstract (en)

[origin: EP2189593A1] The invention concerns a form adjustable panel for curved wall shuttering. The panel is characterised in that the working platform consists of flat platform elements (10,11,12) with suspension (21,22), centring (24,25) and fixing means (27,28,29) on the inner support framework of the form adjustable panel and optionally carrying a foldable flap (36) on at least one of the sides thereof, which can partially overlap an adjacent platform element, to obtain continuity of the platform, and in that the support framework of the form adjustable shuttering panel has openings (23,30) for the suspension and fixing of each individual platform element.
