Abstract (en)

[origin: EP2189596A1] The basin has a basin covering structure including a roller shutter (8) that is rolled up around a motorized horizontal roller (9) partially immersed in the basin. The basin covering structure is partially hidden by a support platform (13) supporting a surface coating (14). The platform is extended horizontally at a flat top (3) of a peripheral wall (2). A fixation edge of a flexible impermeable internal lining (5) is formed with a projection (7) at a level of a connection zone of a nose (15) of the platform to adopt a profile of the nose. The projection is extended under the platform.
