Abstract (en)
[origin: EP2189613A1] The present invention concerns a set of elements suited to make frames or casings (1) for doors, windows, door/window panels or the like; said set comprises a first element (1ti) and a second element (1m), suited to be connected to each other in such a way as to preferably form a substantially right angle. The second element (1m) comprises a seat (1ma) suited to at least partially house a portion (1tis) of the first element. Said seat is open on at least three sides and closed on the remaining three sides.
