Abstract (en)

[origin: EP2189616A1] The frame has a U-shaped section (10) arranged on one side of a double glazing (4). A pressing section (5) is provided with an L-shaped sectioned part. A wing (11) of the pressing section is engaged at an interior of the U-shaped section. Another wing (12) of the pressing section is fixed with a mounting structure (3) by a dismountable connection, so as to press the double glazing against a compact seal (19) mounted on the mounting structure. A thermally insulating part (14) is inserted between the wings in contact with the U-shaped section and the pressing section.
