Abstract (en)

[origin: WO2009030388A1] The invention relates to a method and a device (1, 20) for the strip position control of a strip (2, 21), which has at least one sensor (6, 26) for detecting a curvature of the strip (2, 21) in a direction transverse to the longitudinal direction and/or for detecting a distance of the strip from a predeterminable strip position, wherein at least one correcting roller with an adjusting device for the automated setting of the at least one correcting roller (9, 24) is provided to achieve a minimization of the curvature and/or to achieve the strip position.
