Abstract (en)

[origin: FR2920448A1] The module (1) has a monoblock carrier structure (2) made of reinforced concrete with two longitudinal beams (4) whose upper surface (5) is flat and works as a rolling track for tires of an urban transport vehicle. A set of connecting crosspieces (8) connects the beams by parallelly maintaining the crosspieces. An I-shaped rail guiding section (3) is mounted on the carrier structure to guide the urban transport vehicle, and the module is in straight, curve or trapezoid-shaped.
