Abstract (en)

[origin: FR2912768A1] The system has vertical posts (10) whose part includes an effect for permitting installation of outer and inner finishing facings through a seaming technology. A part of hollow construction corresponding to width between the facings is calculated for receiving wool type insulation, where the insulation is made of glass and polystyrene. The hollow construction part permits passage of pipes, and heating and air conditioning sheaths. Metallic profiles (2) of the posts include grooves (5) or projection parts for installing clamping fittings or collars to fix the pipes and sheaths.
