Abstract (en)
[origin: WO2009024239A2] The invention relates generally to the field of virology. More particularly, the present invention relates to methods for determining the permissiveness of a cell for a virus that is a member of the family Arteriviridae or Coronaviridae or Asf arviridae, in particular for Porcine Reproductive and Respiratory Syndrome Virus (PRRSV). The invention further provides methods and compositions related to the generation of host cells permissive for a virus that is a member of the family Arteriviridae or Coronaviridae or Asfarviridae, in particular for Porcine Reproductive and Respiratory Syndrome Virus (PRRSV). Methods of using said cells thus identified or thus generated, in preparing a culture of a virus that is a member of the family Arteriviridae or Coronaviridae or Asfarviridae, as well as the use of said virus for the purpose of vaccine production or diagnosis, are also provide by the present invention.
