Abstract (en)  
The support has an even supporting area (1) and two lateral folded bent sections (2a, 2b), where the support is made of sheet metal. The two oppositely arranged bent sections (2a) are formed by multiple folding from three layers of the sheet metal. The oppositely arranged bent sections have end-lateral retaining devices (3) that are formed by notches of the sheet metal. Lateral edges of the sheet metal are interior-laterally arranged at the oppositely arranged bent sections. The bent sections are arranged with respect to the supporting area at right angle.

Abstract (de)  
Die Erfindung betrifft eine Regalauflage aus einem Blech mit einem ebenen Ablagebereich (1) und seitlichen, gefalzten Abkantungen (2a,2b). Erfindungsgemäß sind zumindest zwei gegenüberliegend angeordnete Abkantungen (2a) durch mehrfaches Falzen aus zumindest drei Lagen des Bleches gebildet.
