Abstract (en)

[origin: EP2192247A2] The element (60) has an element frame (1) and a bracing connected with each other by a latching device. The latching device has a latching unit formed as a detent spring (20) and engaged into another latching unit (2). A carrier element (30) has an end (31) connected with the frame or bracing and another end (32) accommodated in a holding groove (4) of the frame or bracing. The former latching unit has a bracing-sided end (21) attached at the bracing and a frame-sided end (22) formed as an engaging lug.
