Abstract (en)

A flashing for a sloping roof penetrating component like roof window, solar collector or the like, that includes: A first portion (16a) and a second portion (16b), pivot means (17) linking the first portion (16a) and second portion (16b), where the second portion (16b) comprises attachment means configured to be fixed at the top frame of a roof component and said first portion (16a) when in use provides a drain cavity (18). The first portion (16a) provides adjustment means for minimizing a gap (19). The invention also relates to a flashing system and a flashing method.
