Abstract (en)  
[origin: EP2192363A1] The fridge-freezer has an internal space for receiving a cooling and/or freezing product, and a door (10) for closing the internal space. A receptacle i.e. vegetable tray (40), is arranged in the internal space, and a door rack (20) is arranged at the door. The door rack has depth that is selected such that the door rack operates as a full or partial cover for an opening of the receptacle in sections, when the door is closed. The receptacle is located in a recess at a base. The depth is selected such that the door rack covers a front region of the receptacle, when the door is closed.
