Abstract (en)

A sighting device (10) is mountable to a gun (2000). The device includes a light source (20) (preferably a laser), a power source (30) connectable to the light source (20) and a mount (102) attachable to the gun (2000) so that the laser is juxtaposed either the top surface of the gun (2000) or a side surface of the gun (2000). In one embodiment, the sighting device (10) includes a bottom rail mountable in a slot (2010) on the gun (2000), wherein the slot (2010) is preferably positioned on the top surface of the gun (2000). The sighting device (10) may also include a mechanical sight that functions as the rear mechanical sight on the gun and/or a secondary light source.
