Abstract (en)

[origin: WO2009024686A2] This invention relates to life's necessities and in particular those relating to health. It also relates to a method for preparing a dry hydrodispersible pharmaceutical form. The invention provides a method for preparing a dry hydrodispersible pharmaceutical form by dispersing an active principle(s) in an ester of a fatty acid of polyoxyethylene 32 in hot water. The resulting dispersion is then granulated and fluidized. The resulting granules are then distributed in pharmaceutical compositions after dilution with an inert pharmaceutical acceptable excipient. Application to the preparation of pharmaceutical compositions containing one or more inert non-toxic pharmaceutical acceptable excipients.
