Abstract (en)

[origin: US2011143608A1] A surface drive for a watercraft (100) that is operated in different operating ranges dependent on a speed of the watercraft (100). A trim angle (τ) is adjusted automatically in at least one operating range, via a closed control loop, with detection of preset regulating parameters and is automatically controlled, in at least one other operating range, with detection of preset control parameters in a manner established for the operating range.
