Abstract (en)  
[origin: CA2701079A1] The invention generally pertains to onboard systems for passengers such as In-Flight Entertainment (IFE) Systems. The invention more particularly relates to a system and a method for accessing a personal computer device (3) onboard an aircraft and to an aircraft including such a system. The system includes an onboard network (12) to which is connected at least one interface (4) at a passenger's seat (si) and connection means. The system is arranged so that said interface and said personal computer device interact via the transmission of data on said onboard network.
