Abstract (en)
[origin: WO2009043721A1] The invention relates to a washing machine comprising a detergent solution tub (1) having at least one carrier element (5) on which a mounting arm (7) of a drive motor (3) can be mounted for driving a washing drum that is disposed in the solution tub (1) in a rotating manner, said carrier element (5) or mounting arm (7) having a connecting element (15) that is guided through an installation bore (17) of the mounting arm (7) of the drive motor (3) or carrier element (5). A safety part (18) is also provided that secures the mounting arm (7) to the drive motor (3) on the connecting element (15). According to the invention the safety part (18) is designed in an integral manner and in one piece with the carrier element (5) and/or the connecting element (15) and/or the mounting arm (7).
