Abstract (en)

[origin: WO2009036721A2] The invention relates to a coating agent for fibres containing pigment, binders and a thickening agent, said thickening agent being a non-degraded, non-depolymerised starch with an amylopectin content of more than 40%, the quantity of starch being between 0.05 and 3.0 percent by weight in relation to the pigment fraction. The invention also relates to a method for producing said agent and to the use thereof.
