Abstract (en)

[origin: WO2009043695A2] The invention relates to an electrical domestic appliance comprising a cold reservoir, especially to an electrical refrigerator. Said refrigerator includes a cabinet body comprising a refrigeration compartment, a door for closing the refrigeration compartment, which is mounted on the interior of the door, the interior of the door having a projection facing the refrigeration compartment, said projection having an opening through which chunks of ice can be transported from the refrigeration compartment, a depression being formed on the projection under said opening and the cold reservoir being mounted in said depression.
