Abstract (en)
Wagon train comprising a storage (13) for ballast and a unload and load means for the ballast with conveyor belts (5, 6) above each other such that remote from the storage the ballast simultaneously in separate flows in opposite directions is transported through the train across a distance of more than a half, a complete or one and a half wagon length. There is also a conveyor track (7) that can pivot over 90 degrees, to take a the train narrow keeping transport position and an aside above the adjacent track projecting operating position
