Abstract (en)
[origin: EP2194221A2] The element (14) has a chamber formed as a guide rail (12) or as a support for the guide rail, and another chamber provided laterally beside the former chamber. A side flank (40) of the latter chamber turned away from the former chamber is defined at a framework element of a window or a door. The latter chamber is limited as the former chamber. The latter chamber is formed as a support for a covering element (20) and locked concisely with the guide rail and/or a building soffit (10). A common wall (36) is provided between the chambers.
